

automatic distributor

data sheet

product

Distributor of bags **Sumus®** for the collection of domestic biowaste and/ or bags **Sumus®** for the paper collection and/or plastic bags for plastic collection and undifferentiated waste. The capacity is variable depending on the type of bag to be distributed.

The distributor **Sumus®** is set by default to work in "stand alone" mode: a download/upload data from a dedicated FTP area is provided. However, it can be integrated into computerized ecological islands.

Quick and easy integration with **Sumus®** distributor. adding:

- » an export procedure - typically daily - of a text file containing the list of service enabled (access-list in the declination white-list and black-list)
- » a procedure for the import of records containing the number of bags dispensed

In the case of installation of several distributors **Sumus®** in the same municipality, you can take advantage of the synchronization service (it avoids therefore that a user can withdraw the bundle of paperbags or the kit of paperbags on one of the distributors then go on a second to make a new withdrawal out of limit)

size

size in cm
